

# SMARTBOOTS

## CONNECTED TECH THAT CHARGES WITH EACH STEP

SolePower SmartBoots help dismounted soldiers be safer and more efficient by increasing their situational and physiological awareness even when access to power is scarce. The system is self-powered by a kinetic charger. SolePower is looking for collaboration opportunities within the DoD.

 **Location**  
GPS, Dead-Reckoning

 **Sensing**  
Temperature

 **Communications**  
WiFi, Encrypted RF

 **User Data**  
Physiological Status, Fatigue

 **Kinetic Charger**  
Reliable Power Supply
